ABSTRACT

This study was aimed to determine the socialization strategies in teaching Contemporary Issues in Araling Panlipunan and the performance of Grade 10 Students in a modular distance learning modality in terms of students' social skills, work skills and reasoning skills. This study utilized a descriptive-correlational design of research. The researcher used a survey questionnaire of three parts, namely: students' profile; socialization strategies in teaching contemporary issues, and the overall performance of grade 10 students. The study was conducted to 120 Grade 10 students, 30 respondents for pilot testing, and the remaining 90 for the actual conduct of the study. Respondents were enrolled from Balele Integrated High School, City Schools Division of Tanauan S.Y. 2020-2021. Three experts validated the research instruments. Lesson exemplar was made to reflect the socialization strategies to be employed by the teacher in the facilitation of teaching-learning. Students were tasked to perform the activities and have it documented through videos and photos. Survey questionnaires were administered after the three-week instruction period. After the survey, the data were gathered, tabulated, and analyzed. The following is the statistical analysis using Pearson Product-Moment Correlation Coefficient. There is a considerable relationship between socialization strategies employed by teachers in teaching contemporary issues in Araling Panlipunan and the performance of Grade 10 students. Additionally, descriptive statistics such as mean, standard deviation and percentage was used and revealed that the overall performance of the respondents, grade 10 students in terms of Social Skills; Work Skills; and Reasoning Skills are all outstanding. The researcher found out as well that the extent of the socialization strategies for students employed by teachers in teaching contemporary issues as to model manner, classroom jobs, role playing social situations and buddy-buddy approach, are all with great extent.
